

IV THERAPY MENU

Explore Our IV Therapy

Discover the IV infusions and add-ons available at Aeon. Your Medical Practitioner will guide you in selecting the options that best support your health, performance, and wellness goals.

● **Multinutrient: \$167**

A balanced blend of vitamins and minerals, designed to support nutrient absorption and overall health. A strong foundation for a wide range of optimization goals. Enhance your IV with a personalized add-on. See the next page for options.

● **Immune Boost: \$207**

Formulated with higher doses of Vitamin C and Zinc to strengthen your immune defenses. Often used to help reduce the risk or duration of viral infections. A popular choice before travel to support resilience.

● **Performance & Recovery: \$220** PATIENT FAVOURITE

Formulated with extra hydration, Amino Acids and vitamins to support muscle repair and recovery. Ideal after intense training or workouts to help your body bounce back faster.

● **Calm: \$190**

A multinutrient IV with additional ingredients that help to support feelings of relaxation and calm. Can be used for short-term stress support or as part of a longer-term plan for managing ongoing anxiety.

● **Glow: \$190** PATIENT FAVOURITE

Formulated to support collagen production, wrinkles, skin tone, and pigmentation - helping you bring out your natural glow. May also support hair growth.

*This IV includes the glutathione add on at no additional cost.

● **Migraine Relief (preventative): \$190**

A multinutrient IV with added magnesium and B vitamins, nutrients shown to support migraine prevention. Best used as part of a regular schedule to reduce migraine frequency.

*Optional - consider adding the Medical Migraine Relief addition if you are experiencing an acute migraine.

● **Iron Infusion: \$280**

An effective way to restore iron and ferritin levels, while avoiding the gastrointestinal side effects often associated with oral iron supplements. This IV requires a prescription and is not included in the IV cost.

IV THERAPY MENU

Add-Ons Available

● Medical Migraine Relief: \$220

A combination of prescription IV medications (commonly used in the urgent care setting) and our nutrient Migraine IV base is used to treat a day-of acute migraine.

Please note - a brief Physician consult or previous approval is required.

● NAD Addition: \$58

Nicotinamide adenine dinucleotide (NAD⁺) is a vital coenzyme found in every cell, essential for energy production, DNA repair, and healthy cellular signaling. NAD levels naturally decline with age - a factor linked to reduced energy and age-related health challenges. IV NAD replenishes these levels directly, supporting mitochondrial function, cellular repair, and overall resilience in ways oral supplementation cannot.

● Glutathione Addition: \$58

Glutathione is a powerful antioxidant naturally produced in the body, vital for detoxification, immune balance, energy production, and neurological protection. Because it's highly sensitive to oxidation and poorly absorbed orally, IV administration is the most effective way to replenish and restore optimal levels.

● Methylcobalamin (B12): \$8 PATIENT FAVOURITE

An important vitamin for DNA synthesis, red blood cell formation, and neurological health. This is a great alternative to the B12 injection. Consider adding it instead!

● Zinc: \$8

A vitamin that is not produced by our bodies, and must be supplemented. Improves immunity, aids in digestion, improves skin health and the healing of injuries.

● Taurine: \$8

Supports GABA receptor function. Can lower blood pressure and help to calm the nervous system.

● Carnitine: \$8 (subject to availability)

Supportive to the function of the heart, brain, and muscles. Can improve the metabolism of fat.
